Assistant Professor of Chemistry – Physical/Analytical – Tenure Track

Review of applications begins on September 24, 2018
Closing Date: when filled

The Department of Chemistry and Biochemistry at Southwestern University seeks applicants for a tenure-track Assistant Professor of Chemistry beginning in August 2019. The successful candidate must be committed to excellence in undergraduate teaching and is expected to develop a productive undergraduate research program.

A PhD in chemistry or related field is required by August 2019.

Teaching responsibilities include general chemistry, upper-level physical chemistry, chemistry for non-majors, and courses within the university’s general education program such as First Year Seminar. In particular, the candidate must have demonstrated competency to teach within core physical chemistry areas such as thermodynamics, kinetics, and quantum mechanics. The candidate should have a strong commitment to working with diverse student populations in the classroom and laboratory.

Additionally, the successful candidate will develop a research program that significantly incorporates undergraduate students. Research programs in which experimental physical or analytical chemistry is a central component are strongly preferred. Other responsibilities of the position include advising students and university service.
